

Eduardo Ribas

Web Developer • Technical in Internet Informatics

São Paulo, Brazil • ribasdois@gmail.com

About me

I am a web developer with over 2 years of professional experience in the field, always aiming to provide accessible and functional experiences for all types of users. Additionally, I strive to bring designs to life with the highest level of fidelity.

My main skills involve developing applications with a focus not only on the user experience but also on the developer's experience. Creating scalable code and providing users with exceptional navigation are fundamental pillars of good service.

Strengths

User experience and interface, high-fidelity design replication (pixel-perfect), and scalable, easily maintainable code.

Skills

HTML, CSS, JavaScript, TypeScript, React JS, Next JS, C#, MUI, Tailwind CSS, Shadcn UI, Figma, Git, Prisma ORM, PlanetScale, MySQL, SQL Server, Stripe, Resend

Experience

Tecnologia Única • Pre-Junior Full Stack Developer 2 • 2023 to present

As a full-time developer, I continue to actively work on all tasks related to the startup's platform where I work. I develop modular and well-documented components that are easy to implement across various use cases, while always aiming for optimal performance and ensuring they are always accessible. I participate in refactoring various functionalities to improve code readability and facilitate future maintenance. I have experience with file uploads to our .NET-based API, payment flows integrating tools like MercadoPago and PagarMe, authentication using JWT (JSON Web Tokens), and various integrations with external APIs. I communicate my ideas with utmost clarity to ensure all my teammates understand my thought process. Whenever I encounter a problem, I analyze it thoroughly, thus plotting the best way to solve it while consuming the least resources possible. I continue to deepen my knowledge in React, SQL Server, and C#.

Devely • Final Course Project • 2023 to present

My final project for the High School Diploma integrated with a Technical Degree in Internet Informatics was an incredible opportunity for me to develop some of my soft skills, such as leadership, proactivity, and persistence. I delved deeply into technologies like NextJS, TypeScript, Shadcn UI, Prisma ORM, PlanetScale, Stripe, Cloudinary, MySQL, Resend, and Figma, gaining experience in creating a complete platform, from sketch to development. I dealt with user authentication, email sending, payment flows, and image uploads to a cloud storage service. It was a comprehensive experience that gave me much more confidence in the quality of my work.

Tecnologia Única • Intern • 2022 to 2023

My internship at Tecnologia Única allowed me to learn more about startups and develop my technical and social skills. Communication was essential for adapting to an environment that was new to me at the time. At the startup where I worked, I developed several landing pages and actively participated in the development and maintenance of our platform. I used technologies like NextJS, ReactJS, TypeScript, SASS, MUI, C#, and SQL Server.

Pequenos Talentos • Volunteer • 2022 to 2023

Durante o meu tempo como padrinho voluntário do projeto Pequenos Talentos, um projeto que visa capacitar jovens do ensino fundamental na área de tecnologia e auxiliá-los na ingressão do mercado de trabalho, eu pude auxiliar os alunos no desenvolvimento de suas tarefas, bem como atuar no desenvolvimento e manutenção da landing page do projeto utilizando tecnologias como React, SASS e Tailwind CSS.

FETEPS • Volunteer • 2023 até 2024

FETEPS is a space for demonstrating and socializing projects developed by students from Centro Paula Souza and other participating institutions, featuring innovative characteristics, social transformation, technology application, and creativity. I worked in a team with various people with different levels of knowledge in prototyping and developing a platform to manage various data related to the event. We used Fluent UI as the design base for this platform to provide a familiar experience for the administrators who would be using the system, as they were already familiar with the Microsoft ecosystem due to a partnership.

Education

ETEC Maria Cristina Medeiros • 2021 - 2023 • High School

High School Diploma with a Technical Degree in Internet Informatics.
